Protocol Title:

THE INTERNATIONAL NUTMIDLINE CARCINOMA REGISTRY

DF/HCC Principal Research Doctor / Institution:

CHRISTOPHER A. FRENCH, M.D. / BRIGHAM AND WOMEN'S HOSPITAL

DF/HCC Site-Responsible Research Doctor(s) / Institution(s):

Stephen Sallan, MD/Dana-Farber Cancer Institute-Boston Children's Hospital

The International NUT Midline Registry is open to individuals of all ages. If you are a parent or guardian of a child under 18 years old, the word "you" refers to your child. You, the parent, will be asked to read and sign this document to give permission for your child to participate.

A. INTRODUCTION

You are being invited to take part in a research study. Research is a way of gaining new knowledge. A person who participates in a research study is called a "participant." This research study collects information about NUT midline carcinoma and NUT-related carcinomas (henceforth both referred to as NUT midline carcinoma). Because it is a rare condition, is expected that about 10 to twenty people per year will take part in this research study.

This research consent form explains why this research study is being done, what is involved in participating in the research study, the possible risks and benefits of participation, alternatives to participation, and your rights as a research participant. The decision to participate is yours. If you decide to participate, please sign and date at the end of this form. We will give you a copy so that you can refer to it while you are involved in this research study.

The National Cancer Institute (NCI) and the Boehringer Ingelheim Pharmaceuticals Inc. are supporting the research study by providing funding for the research study.

We encourage you to take some time to think this over, to discuss it with other people and your primary doctor, and to ask questions now and at any time in the future.

DFCI Protocol Number: 10-228	Approved Date (DFCI IRB Approval): 03/31/2021
Date Posted for Use: 04/02/2021	

**Research Consent Form
for Biomedical Research**

OHRS 04.22.16

This study is funded in part by the Closing the AYA Gap Fund, Alex’s Lemonade Stand Foundation, and by the Boehringer Ingelheim Pharmaceuticals Inc. and the National Institutes of Health (National Cancer Institute).

B. WHY IS THIS RESEARCH STUDY BEING DONE?

NUT midline carcinoma is a rare and aggressive form of cancer. Currently there is no standardized or effective way to treat this disease. We are gathering information (creating a Registry) about NUT midline carcinoma to develop a better understanding of this condition. Because NUT midline carcinoma is rare, very little information is available in the medical literature. The goal of this research will be to better understand NUT midline carcinoma so that improved ways to diagnose, treat, and cure NUT midline carcinoma can be developed.

We will gather information about how people with NUT midline carcinoma are diagnosed, where the tumor grows within the body, its pattern of spread, and how it responds to various treatments. We also will collect specimens of tumor and blood from individuals with NUT midline carcinoma and store them in a central sample bank. These samples will be used for research to discover how this tumor forms, grows, spreads, and resists treatment.

C. WHAT OTHER OPTIONS ARE THERE?

Taking part in this research study is voluntary. Instead of being in this research study, you have the following option:

- Decide not to participate in this research study

D. WHAT IS INVOLVED IN THE RESEARCH STUDY?

Before the research starts (screening):

We will need to review a sample to confirm that you have NUT midline carcinoma and thus can be in the research study. If our tests do not confirm that your tumor is NUT midline carcinoma, you will not be able to participate in this study.

DFCI Protocol Number: 10-228	Approved Date (DFCI IRB Approval): 03/31/2021
Date Posted for Use: 04/02/2021	

**Research Consent Form
for Biomedical Research**

Dana-Farber/ Harvard Cancer Center
BIDMC/BCH/BWH/DFCI/MGH/Partners Network Affiliates

OHRS 04.22.16

Additional research procedures to be performed at the time of screening but not required to determine eligibility:

If you participate in this research study, you can choose to share information about your diagnosis, age, sex, and medical records (such as x-rays and x-ray reports surgical and pathology reports, treatment records, and family medical history) with this Registry. In addition, you can choose to share pathology specimens of your tumor and a blood sample with this Registry for storage in our sample bank. These specimens would be left over material from biopsies or surgeries that were performed as part of clinical care.

Tumor and blood samples may be subjected to genetic analysis in order to study the genes involved in NUT Midline Carcinoma. These methods study the set of genetic material and molecules of a participant's cancer cells, referred to as the genome or transcriptome. Due to the in-depth level of analysis, it is possible, but very unlikely, that the results of these tests could contain information that could potentially be used to identify the participant.

Rapid progress in understanding and treating cancer will occur when some of the genetic information derived from your tissues and blood can be shared with other researchers. In particular, the National Institutes of Health (NIH) and other organizations have developed special data (information) repositories that analyze data and collect the results of certain types of genetic studies. These central banks will store your genetic information and samples, and provide them to qualified researchers to do more research. Therefore, we are asking your permission to share your results with these public databases. Some of this information may be made available over the internet and will be freely available to anyone who is interested (an open access database). Other, more detailed information may only be accessed by scientists at other research centers who have received special permission to review your de-identified data (a controlled access database).

Your information or samples will be sent only with a code number attached. Your name or other directly identifiable information will not be shared with these repositories or with other investigators. There are many safeguards in place to protect your information and samples while they are stored in these repositories and used for research. There is a slight risk of loss of privacy when sharing this information with these banks but we have established procedures to encode your samples and information and to protect your data. The repositories also have robust procedures in place to protect the confidentiality of the stored data. We

DFCI Protocol Number: 10-228	Approved Date (DFCI IRB Approval): 03/31/2021

OHRS 04.22.16

will do everything we can to protect your data but we cannot absolutely guarantee its privacy or predict how genetic information will be used in the future.

The Genetic Information Nondiscrimination Act of 2008 (GINA) is a federal law that protects Americans from being treated unfairly because of differences in their DNA that may affect their health, and may prevent discrimination by health insurers and employers based on genetic information. GINA is intended to ease concerns about discrimination that might keep some people from getting genetic tests that could benefit their health, and enable people to take part in research studies such as this without fear that their DNA information might be used against them by health insurers or their workplace. This protection does not extend to disability or life insurance. Additional information can be found at <http://www.genome.gov/10002328>.

We would like to keep track of your medical condition for the rest of your life. We would like to do this by contacting you or your doctor once a year to see how you are doing. Keeping in touch with you and checking on your condition helps us determine the long-term outcomes of individuals with NUT midline carcinoma.

E. HOW LONG WILL I BE IN THIS RESEARCH STUDY?

You will be in this research study indefinitely.

However, the research investigator may decide to take you off the research study for reasons such as:

- It is considered to be in your best interest
- There is any problem with following study treatments and procedures
- There are any problems with research funding

If you are removed from the research study, the research Investigator will explain to you why you were removed.

F. WHAT ARE THE RISKS OR DISCOMFORTS OF THE RESEARCH STUDY?

There are risks to taking part in any research study.

DFCI Protocol Number: 10-228	Approved Date (DFCI IRB Approval): 03/31/2021
Date Posted for Use: 04/02/2021	

**Research Consent Form
for Biomedical Research**

OHRS 04.22.16

Although many steps will be taken to keep personal information confidential, there is some risk that confidentiality will not be maintained. Risks associated with blood collection include discomfort, bruising, and a very low risk of infection.

During the research study, you will be notified of newly discovered side effects or significant findings, which may affect your health or willingness to participate. You may be asked to sign a new consent form that shows that you have been informed of new information relating to this research study.

G. WHAT ARE THE BENEFITS OF THE RESEARCH STUDY?

There is no immediate or direct benefit to you from being included in this Registry. Indirectly, having medical data and samples in this Registry will help physicians and researchers learn more about NUT midline carcinoma and its treatment. In the future, the information may be helpful to others in the treatment of NUT midline carcinoma.

H. CAN I STOP BEING IN THE RESEARCH STUDY AND WHAT ARE MY RIGHTS?

You have the right to choose not to sign this form. If you decide not to sign this form, you cannot participate in this research study.

You may stop being in the research study at any time. If you choose not to participate, or if you are not eligible for participate, or if you withdraw from this research study, this will not affect your present or future care and will not cause any penalty or loss of benefits to which you are otherwise entitled.

I. WILL I BE PAID TO TAKE PART IN THIS RESEARCH STUDY?

We may use your samples and information to develop a new product or medical test to be sold. The sponsor and hospital may benefit if this happens. There are no plans to pay you if your samples are used for this purpose.

J. WHAT ARE THE COSTS?

Taking part in this research study will not lead to added costs to you or your insurance company.

DFCI Protocol Number: 10-228	Approved Date (DFCI IRB Approval): 03/31/2021

You or your insurance company will be charged for portions of your care during this research study that are considered standard. You may be responsible for co-payments and deductibles that are typical for your insurance coverage.

If you have questions about your insurance coverage, or the items you might be required to pay for, please call financial services for information. The contact information for financial services:

- Brigham and Women’s Hospital: (617) 732-5524 or (617) 732-7485
- Dana-Farber Cancer Institute: (617) 632-3455
- Boston Children’s Hospital: (617) 355-7188

The National Cancer Institute provides an online resource to help people participating in cancer clinical trials understand which services their insurance company is required by law to pay. This can be found at the website below or can be provided by the study team:

www.cancer.gov or 1-800-4-CANCER (1-800-422-6237)

K. WHAT HAPPENS IF I AM INJURED OR BECOME SICK BECAUSE I TOOK PART IN THIS RESEARCH STUDY?

Due to the nature of this Registry, there is no possibility for injury or becoming sick by participating in this research study.

L. WHAT ABOUT CONFIDENTIALITY?

We will take measures to protect the privacy and security of all your personal information, but we cannot guarantee complete confidentiality of study data.

Medical information created by this research study may become part of your hospital medical record and may be forwarded to your primary doctor. Information that does not become part of your medical record will be stored in your study file. It may also become part of a DF/HCC research database.

OHRS 04.22.16

The results of this research study may be published. You will not be identified in publications without your permission.

As participation in this study involves providing a specimen of your tissue, please know that if the research doctor leaves the institution, the research and the tissue might remain at the DF/HCC or might be transferred to another institution.

M. WHOM DO I CONTACT IF I HAVE QUESTIONS ABOUT THE RESEARCH STUDY?

If you have questions about the study, please contact the research doctor or study staff as listed below:

Brigham and Women’s Hospital

Christopher A. French, M.D. (Principal Investigator, Pathology): 617-525-4415

Dana-Farber Cancer Institute

Stephen E. Sallan, M.D. (Pediatric Oncology): 617-632-3316

Christopher S. Lathan, M.D., M.S., M.P.H. (Adult Oncology) 617-632-6634

For questions about your rights as a research participant, please contact a representative of the Office for Human Research Studies at DFCI (617) 632-3029. This can include questions about your participation in the study, concerns about the study, a research related injury, or if you feel/felt under pressure to enroll in this research study or to continue to participate in this research study.

N. PRIVACY OF PROTECTED HEALTH INFORMATION

Federal law requires Dana-Farber/Harvard Cancer Center (DF/HCC) and its affiliated research doctors, health care providers, and physician network to protect the privacy of information that identifies you and relates to your past, present, and future physical and mental health conditions (“protected health information”). If you enroll in this research study, your “protected health information” will be used and shared with others as explained below.

1. What protected health information about me will be used or shared with others during this research?

- Existing medical records, including mental health records.

DFCI Protocol Number: 10-228	Approved Date (DFCI IRB Approval): 03/31/2021
Date Posted for Use: 04/02/2021

- New health information created from study-related tests, procedures, visits, and/or questionnaires
- Genomic analysis of my tumor or normal tissue obtained from tumor in the tumor bank or from blood. The genomic analysis may include whole genome or transcriptome sequencing that could potentially contain identifying information.

2. Why will protected information about me be used or shared with others?

The main reasons include the following:

- To conduct and oversee the research described earlier in this form;
- To ensure the research meets legal, institutional, and accreditation requirements;
- To conduct public health activities (including reporting of adverse events or situations where you or others may be at risk of harm); and
- To provide the study sponsor with information arising from an adverse event or other event that relates to the safety or toxicity of the drug for the purpose of this or other research relating the study drug and its use in cancer; and,
- Other reasons may include for treatment, payment, or health care operations. For example, some medical information produced by this research study may become part of your hospital medical record because the information may be necessary for your medical care. (You will also be given a notice for use and sharing of protected health information.)

3. Who will use or share protected health information about me?

- DF/HCC and its affiliated research doctors and entities participating in the research will use and share your protected health information. In addition, other DF/HCC offices that deal with research oversight, billing or quality assurance will be able to use and share your protected health information.

4. With whom outside of DF/HCC may my protected health information be shared?

While all reasonable efforts will be made to protect the confidentiality of your protected health information, it may also be shared with the following entities:

- Outside individuals or entities that have a need to access this information to perform functions relating to the conduct of this research such as

DFCI Protocol Number: 10-228	Approved Date (DFCI IRB Approval): 03/31/2021
Date Posted for Use: 04/02/2021	

**Research Consent Form
for Biomedical Research**

analysis by outside laboratories on behalf of DF/HCC and its affiliates (for example, data storage companies, insurers, or legal advisors).

- The sponsor(s) of the study, its subcontractors, and its agent
- Other research doctors and medical centers participating in this research, if applicable
- Federal and state agencies (for example, the Department of Health and Human Services, the Food and Drug Administration, the National Institutes of Health, and/or the Office for Human Research Protections), or other domestic or foreign government bodies if required by law and/or necessary for oversight purposes. A qualified representative of the FDA and the National Cancer Institute may review your medical records.
- Hospital accrediting agencies
- A data safety monitoring board organized to oversee this research, if applicable
- Non-profit or for-profit organizations in collaborative efforts to develop new therapeutic strategies. Any information shared with these groups will be de-identified.

Some who may receive your protected health information may not have to satisfy the privacy rules and requirements. They, in fact, may share your information with others without your permission.

5. For how long will protected health information about me be used or shared with others?

- There is no scheduled date at which your protected health information that is being used or shared for this research will be destroyed, because research is an ongoing process.

6. Statement of privacy rights:

- You have the right to withdraw your permission for the research doctors and participating DF/HCC entities to use or share your protected health information. We will not be able to withdraw all the information that already has been used or shared with others to carry out related activities such as oversight, or that is needed to ensure quality of the study. To withdraw your permission, you must do so in writing by contacting the

researcher listed above in the section: “Whom do I contact if I have questions about the research study?”

- You have the right to request access to your protected health information that is used or shared during this research and that is related to your treatment or payment for your treatment, but you may access this information only after the study is completed. To request this information, please contact the researcher listed above in the section: “Whom do I contact if I have questions about the research study?”

O. OPTIONAL RESEARCH STUDIES:

1. ___ I agree to have the physicians, nurses, data managers/data clerks and/or Medical Records Department at my hospital and clinic send the following information to the International NUT Midline Carcinoma Registry:

- Hospital discharge summaries; Consultations; Oncology clinic records; Treatment
- records (chemotherapy, radiation therapy, including chemo roadmaps)
- Surgical/operative reports
- Radiology reports (x-ray, CT scan, MRI scan, bone scan etc) and/or
- copies of x-ray films, scans, electronic files
- Pathologist’s reports on surgical specimens, bone marrow, spinal fluid
- Pathology specimens for confirmation of diagnosis and enrollment in
- NMC Registry
- Family medical history including family medical history diagram

2. ___ I agree to have any leftover material of tumor specimens from biopsies, surgeries, or autopsy sent to the International NUT Midline Carcinoma Registry for inclusion in the sample bank. Tissue in the sample bank will be used for research and may be sent to other non-profit academic institutions or for-profit commercial institutions. The tumor material may be subject to genomic analysis that includes whole genome or transcriptome sequencing. De-identified and coded cell lines may be generated from these tissues in Dr. French’s laboratory. Cell lines derived from tissue in the sample bank may be used in NMC mouse xenograft models or in cell culture experiments in collaboration with other academic institutions or in sponsored research studies with for-profit commercial institutions. In addition, cell lines used either in mouse xenograft studies or in cell culture studies may be modified genetically for research purposes.

**Research Consent Form
for Biomedical Research**

Dana-Farber/ Harvard Cancer Center
BIDMC/BCH/BWH/DFCI/MGH/Partners Network Affiliates

OHRS 04.22.16

3. ___ I agree to allow a sample of blood, not to exceed 50 ml, sent to the International NUT Midline Carcinoma Registry for inclusion in the sample bank. Blood in the sample bank will be used for research and may be sent to other non-profit academic institutions or for-profit commercial institutions. Blood may be subject to genomic analysis that includes whole genome or transcriptome sequencing.

4. ___ I agree to be contacted in the future by the International NUT Midline Carcinoma Registry.

___ I do not agree to be contacted in the future by the International NUT Midline Carcinoma Registry.

If you agree to be contacted:

Name: _____

Address: _____

City, State, Postal/Zip Code: _____

Telephone Number: _____

Email address: _____

5. ___ I agree to be sent a questionnaire collecting information about family medical history, exposures, and background.

P. DOCUMENTATION OF ASSENT

Signature of participant between age of 10 and 18: The person doing this research study has explained what will happen to me if I take part in this research study. My signature below means that I want to be in this research

R. AUTHORIZATION FOR RELEASE OF INFORMATION

This information is released for clinical research conducted by:

The International NUT Midline Carcinoma (NMC) Registry

Patient Name: _____ Date of Birth: _____
Please print (mo / day / year)

I authorize the following to release clinical and laboratory information on the patient named above:

Doctor's Name: _____

Hospital Name: _____

The following information is requested:

- Hospital discharge summaries
- Pathologist's reports on surgical specimens, bone marrow, CSF
- Surgical/operative reports
- Radiology reports (x-ray, CT scan, MRI scan, bone scan etc) and/or copies of xray films, scans, electronic files
- Treatment records (chemotherapy, radiation therapy, including chemo roadmaps)
- Consultations
- Oncology CLINIC records
- Pathology specimens for confirmation of diagnosis and enrollment in NMC Registry
- Family medical history including family medical history diagram

Please send the requested information to:
